Help us investigate low back pain!

We are looking for volunteers with low back pain between the ages of 21 and 65 for a research study involving osteopathic manipulative treatment and postural control.

Participants with low back pain will receive osteopathic manipulative treatment, complete questionnaires, and perform laboratory testing over an 8 week period.

A few of the study exclusion criteria include:
- Previous Spine Surgery
- Spine Fractures
- Physical therapy or any other form of manual medicine in the past 3 months

Interested or have questions, please contact:
